

COGLIN NETWORK SERVICES

State-of-the-Art Facility Franklin County Jail Greenfield, Massachusetts

Office of the Sheriff of Franklin County

Challenges:

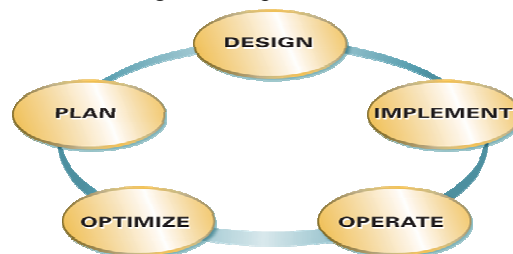

- To Create a Centralized Administration
- To Reduce Administration
- To Reduce Add, Moves and Changes
- Needed an Application to Provide Broadcast Capabilities for Unique Scenarios (ie: Lockdown)
- Desired a Scalable Solution to Protect Investment Dollars

Solution:

- Cisco Call Manger 4.2
- Cisco Unity Unified Messaging
- 130 Cisco IP 7960/7940 Phones Wireless
- Cisco Catalyst 3750G Switches
- IPcelerate IP Session

Project Methodology

Coglin Network Services follows Cisco's Best Practices for Design and Implementation:

Project Management/Resources

To ensure we have the appropriate on site resources for the project: Project Manager, Lead Design Engineer, Implementation Voice Engineers & Technicians and a Dial Plan Designer/End User Trainer.

Project Timeframe

The project schedule unfolded over a period of four months. To ensure 100% readiness prior to cut-over, Coglin implemented the new network in parallel with the old. Given the security component for this implementation, downtime was unacceptable.
